

Zena Endrias

Full Stack Software Engineer

Gaithersburg, MD | (301) - 674 -8482 | zenas@live.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

As a **full stack developer**, I excel in solving equations, crafting algorithms, and thinking critically . I offer strong leadership & technical qualities, to make a big impact in the development arena.

SKILLS:

- **Programming Languages:** HTML, CSS, Javascript, Python
- **Frameworks:** Express, NodeJs
- **Databases:** MongoDB, MySQL, Django
- **Libraries:** React, NextJs , PassportJs, Tailwind, Bootstrap

Experience

Software Engineer | Cypher VII Hackathon | Remote | March 2022

- Hackathon Winner among 216 participants: [The Scheduler App](#)
- Worked on a team of 4 software engineers to build a calendar system for students at William and Mary's College, using MongoDB and Python for the backend and React for the frontend
- Utilized creative problem-solving, cross-functional communication/collaboration, and adaptability

Software Engineering Immersive | General Assembly | Washington DC | April–July 2021

Successfully completed 500+ hours of expert-led instruction in Python, JavaScript, NodeJs , & Django. I applied that instruction developing projects, such as:

- **Ecommerce Site:** Built an e-commerce style website where users can both list items, & reserve listing from others. 'Sellers' have a listing analytics view. This site implemented Google Oauth authentication. [View Here](#)
- **Gaming Chat App:** Built a platform for gamers to interact by creating lobbies centered around their favorite games Built using *React, NodeJs, & MongoDB* . [View Here](#)
- **Job Tracker App:**
